

Friction parts

Brake Rotor & Combo Kit

The disc brake rotors are a very important part in functioning of braking system. As it is a safety critical part in efficient braking, attention and care must be taken in maintaining the part in good condition. TVS Apache rotors are manufactured to match superior design, with the highest care, quality, and metallurgy.

TVS Apache Brake Rotors give you:

- ▶ **Uniform thickness of braking surface:** Top most performance of braking system, maximum comfort and higher durability of components
- ▶ **Optimal dimensional tolerance:** Elimination of disc vibration

Super Rotor

- ▶ Efficient Braking
- ▶ Better Stopping Power
- ▶ Lower NVH

Super Combo Kit

Changing brake pads and rotor at the same time reduces the possibility of problems related to noise, premature wear and tear, fading or judder. In this case, both components experience parallel wear and this ensures correct braking performance for a longer period. Combo kit (Kit disc) includes 2 numbers of brake rotor & one set of brake pads. TVS Apache rotors with TVS Apache pads together offers better compatibility and leads to long life performance. This kit ensures performance and value to end customer.

Friction parts

Brake Rotor & Combo Kit

*Patent pending for vane design

Elite Rotor

TVS Apache Elite brake rotors are equipped with new vane design which enhances air flow and leads to better braking performance. Coated with black paint provides increased corrosion resistance and performance.

- ▶ Better cooling for improved life & performance
- ▶ Rotor Wear indicator
- ▶ Long Pad Life
- ▶ Reduced Vibration

Friction parts

Brake Shoes & Brake Lining

TVS Apache brake shoes are manufactured with high quality process resulting in excellent finish of the product. The best in class adhesive gluing process allows an optimal bedding in operation between the friction material and the shoe. It is recommended to check and replace shoes during brake service as a safety precaution. TVS Apache brake shoes feature with high-performance properties.

Kit Lined Shoe

- ▶ A wide range of Apache formulation and OE formulation
- ▶ Global standard bonding process
- ▶ Non-asbestos material
- ▶ High strength material equivalent to OE standards
- ▶ Super compatibility for low NVH characteristic
- ▶ Wide range of vehicle applications
